There were 3 ballots without initials that were ran through. Hand tallied one vote for Trump due to arrow not being connected for the Insight to catch that vote. Voter on Edge machine voted but the ballot did not print out, poll workers gave the voter another Insight ballot but

the ballot was counted on the Edge so when processing hand tally on Edge machine, there was one vote difference for Clinton versus election night results. Adjusted totals.

Both poll books and absentees match.

2 absentee certificates were signed by the wrong voter. They were a married couple who accidentally signed each other's.

Clerk Frion talked to WEC about the poll books not matching along with missing absentee certificates. They stated to note in the minutes that due to all the inconsistencies there will be no way to determine the correct amount of absentee therefore the board of canvas will need to make a decision on how to handle the amount of absentees not accounted for.

Touch screen (Edge) machine election totals match from election day.

After running all the ballots through the opti-tech, ballot numbers matched minus one for Trump and Clinton.
