Expires 4-11-2023

Reply to the Milwaukee Elections Commission's response
Concerning the Complaints of the April 7th Election that took place

1. The City of Milwaukee Election Commission did not respond to the complaint of knowingly attempting to destroy election material. There is more than enough overwhelming evidence that shows this including a video of the act and the Chief Inspector Report that was furnished in the original complaint. The printing of a ballot machine tape was not in this formal complaint. Please refer to exhibit 1-3 of the original complaint that was filed.
2. The Milwaukee Election Commission is making the argument that they were proactively preventing jams from occurring by removing ballots from the machines. It was clearly stated in the Chief Inspector report that 2 ballot machines were emptied around 2 P.M. because they were at capacity. There was no mention of any jamming issues in the report. Capacity is 2,500 ballots per machine. If there were 5,000 ballots removed from 2 machines at 2 P.M. and the polling site was open for many more hours; it would lead a reasonable person to believe that there were many more ballots cast than the Milwaukee Election Commission has published. Wisconsin State Statute 5.02(15) is defined as follows: "Polling place" means the actual location wherein the elector's vote is cast. This definition clearly states that no ballots should have ever left the area where votes were casted. This would bring doubt in election integrity by most reasonable electors. Please refer to exhibit 1-2 of the original complaint.

I have also attached these exhibits to this reply.

Thank You,

Nick McVey

Record on your GAB-104:

- ✓ Any facility or voting equipment problems or other issues that may have disrupted or delayed voting.
- ✓ Any issues or unusual situations that occur that involved voters, observers, election workers, or law enforcement.
- ✓ Anything that has impacted your ability to reconcile (balance your voter numbers to your ballots).
- ✓ Any provisional ballots issued for this ward.
- ✓ The number of spoiled ballots.

① no reconstructed ballots -/

② Around 10am election inspectors noticed "Chris Larsen" was written in chalk in various sidewalk spot. Removed with water.

③ Around 2pm, two machines were at capacity w/ ballots. Emptied machine by putting ballots in ballot bags & securing in guarded lunchroom

line had already voted & left the polling site that three voters were allowed to enter the line after 8pm. I told observer those were not the instructions given to the two national guards who were placed at the end of the line. And since voters were already gone including guards, there was no one to question.

(6) observer questioned the machine tape that was in the trash. He thought it was a results tape. We showed him it was not, but rather a test configuration tape run in the morning.

4/24/20 - Opened Ballot Bags to Tally
Write-in Votes. Ballots re-sealed in bag, bag # recorded on front.
