Voter Registration through the Voter Public Access Website

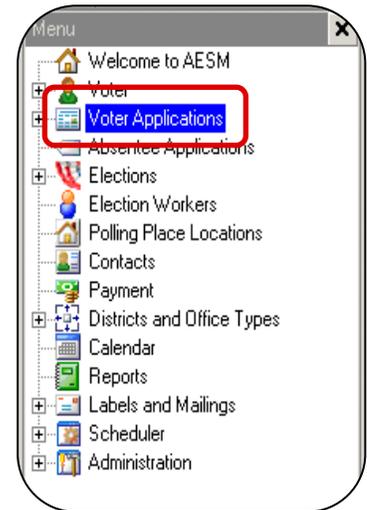

Wisconsin voters may now register to vote through the Voter Public Access (VPA) website. After voters type in their information they must print the application form, sign it, and mail it to their Municipal Clerk. This can be accomplished by hand-delivering it during late registration or on Election Day. The information will be automatically pulled into the Voter Applications node of SVRS each night. Clerks need only review the information for completeness and accuracy and then process the application as normal. The following instructions describe how to search for these applications and process them in SVRS.

Process Click and Mail Registrations in SVRS

Search for Click and Mail Voter Applications:

1. Go to the **Voter Applications** node of SVRS.
2. You can search for Click and Mail registrations in a variety of ways.
 - a. Use the **Application Status** field to search for all **Pending** applications. Note this will return ALL pending Voter Applications and not just those from Click and Mail.
 - b. Use the **Application Source** field to search for all **Online Mail**, **Online Late**, or **Online Election Day Registration** applications.
 - c. Use the **Online ID** field to search for an individual application. The Online ID will appear at the top of the Click and Mail paper registration form.

The **Online App ID** column: All applications submitted through Click and Mail are given an **Online ID**. If a voter submits more than one application, you can use the **Online App ID** to connect the paper form you receive to the electronic application that was submitted.

3. Double-click on the desired record in the data grid to open the Voter Application.
4. Change information in SVRS if necessary.
 - a. Double check the information in SVRS against the paper copy you have received. Make updates if necessary.

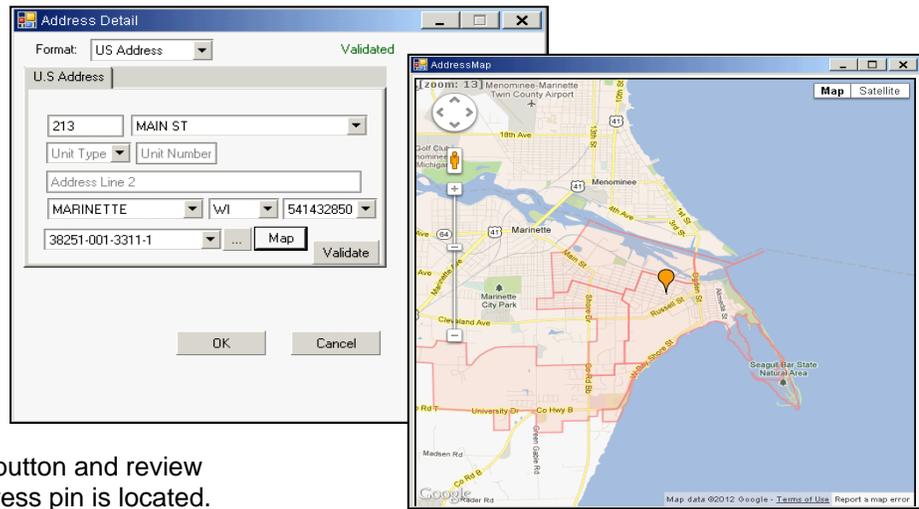

- b. Double-click the **Match (es) Found** link. If 1 or more matches are found, you must click this link to check for possible matches. If the voter has another Voter Record somewhere in the state, you will confirm the match. If not, you can close the screen.

- c. If the voter provided proof of residence, enter the correct information in the **Proof of Residence Type** and **Proof of Res Acct Num** fields. If the voter is a first time registrant by mail and did not provide proof of residence, change the **POR Required** field to **Yes**.

- d. Click and Mail determines the **App Source** based on when the voter entered their Voter Application into Click and Mail. If there is a delay between when the voter entered the application and when they actually mailed it or brought it in, you may have to adjust the **Date on App**, **Efec Reg Date**, and/or **App Source** in SVRS.

- i. If the application was **Online Mail** and was postmarked before the close of registration for that election, you do not have to change the dates or the **App Source**.
- ii. If the application was **Online Mail** and was not postmarked before the close of registration, then the application is not valid for that election. Leave the **App Source** as **Online Mail**, but change the **Date on App** and **Efec Reg Date** to the day after the upcoming election.
- iii. If the application was **Online Late** or **Online Election Day Registration**, but the voter mailed in the form instead of bringing it to the Clerk's office or polling place, change the **Date on App** and **Efec Reg Date** fields to the appropriate date. (If the form arrives on or before Election Day, choose the day after Election Day otherwise use the date you received the form.)
- iv. If the application was **Online Mail** but was turned into the Clerk's office during late registration, adjust the dates and change the **App Source** to **Online Late**.
- v. If the application was **Online Mail** or **Online Late**, but was turned into the polling place on **Election Day**, you must change the **App Source** to **Online Election Day Registration** and correct both dates. Otherwise, the voting history will not be properly recorded.

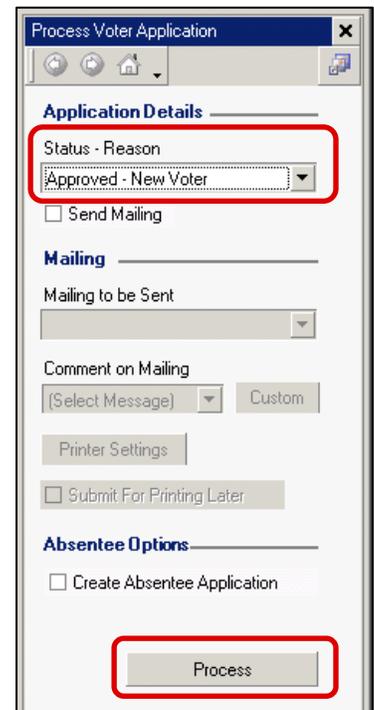

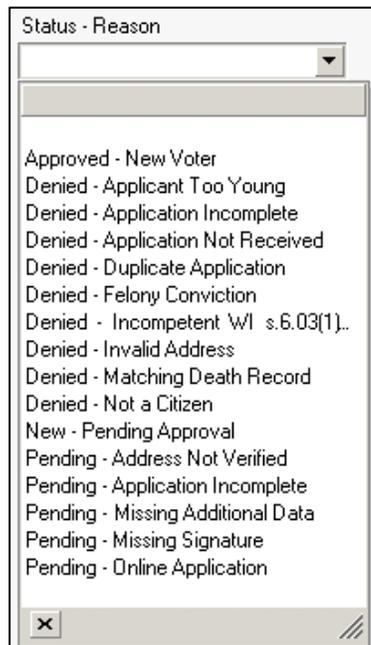

- e. Check to make sure the voter's address was assigned to the correct **District Combo**. If the district combo is not correct, click on the **Home Address** button to bring up the **Address Detail** screen

- i. Click the **Map** button and review where the address pin is located.
- ii. If the address pin is in the wrong location, drag the pin to the correct location and close the map screen. A message will appear noting changes were made to the address geo location and ask if you want to accept the changes. Click **Yes**. Then click **OK** to close the **Address Detail** screen.
- iii. If the address pin is in the correct location, but the district combo is still incorrect (due to a problem with the district line), leave the pin in the correct location and close the map. Pick the correct district combo from the District Combo dropdown. Click **OK** to close the **Address Detail** screen. Please contact the G.A.B. Help Desk to report the district line issue.
- iv. If the address is NOT within your municipality, please contact the G.A.B. Help Desk for further instructions.

5. Process the application.

- a. Click the **Quick Tasks** button at the top of the form to open up the **Process Application** panel.
- b. Choose **Approved – New Voter** or **Approved – Update Voter**. Note - if the application is **Online Election Day Registration**, you will have to choose the correct election and the polling place as well. This will record the vote for that voter.
- c. Click the **Process** button.

Additional Notes about Click and Mail Voter Applications

1. **Voters may bring Click and Mail applications to their polling place on Election Day.** Make sure your Election Workers are aware of [Click and Mail](#) and that they should accept these forms just like any other Election Day Registration application. Note the voter must sign the form in the presence of an Election Worker. If the voter has already signed the application, they should re-sign it at the polling place. They will still need to provide proof of residence and fulfill any other Election Day Registration requirements.
2. **If the voter never mails or turns in their application form,** the application will remain in **Pending** status indefinitely. After 30 days, you may follow the directions above to process the application as **Denied – Application Not Received**. You may attempt to contact the voter to let them know the form was never received, but you are not required to notify the voter.
3. **If an application form comes in to your office after you have Denied the application** in SVRS, you will have to enter the form from scratch. You may still choose **Online Mail** from the **App Source** dropdown list.
4. **If the voter submits multiple applications through Click and Mail,** you should process duplicate applications as **Denied – Duplicate Application**. You may want to search by the voter's name when you receive their paper application, in order to identify any duplicates.
5. **Before you print your poll book(s) for each election, you should search for all Pending applications,** to check for applications that have not been processed correctly. However, you do not have to deny **"Online"** applications that have not been received yet. Any **Pending** applications that are not **"Online"** should be denied or approved as appropriate.

Special Instructions for Entering Click and Mail Applications on Election Day

Several Municipal Clerks have asked whether they could have voters, Election Workers or other staff enter Voter Applications online on Election Day. Voters and Election Workers can enter applications into [Click and Mail](#) by following the directions in this chapter. Remember this requires a computer with Internet access be set up at the polling place and a printer must be available so voters can print and sign their forms.

There are three ways that [Click and Mail](#) can be used at the polling place on Election Day:

- Computers can be set up at the polling place where voters who want to register on Election Day fill out [Click and Mail](#) instead of filling out a paper form. A printer must be connected to any computers set up for [Click and Mail](#) so that the voter can print the form. The voter simply needs to sign and date the form in the presence of an Election Day Special Registration Deputy.
- Election Workers can assist the voter in entering their information into [Click and Mail](#) to speed things up at the polling place or for voters who are not comfortable with computers. The Election Worker would simply ask the voter the questions on [Click and Mail](#) and key in the answers based on the voter's response. The Election Worker should allow the voter to view the Confirmation page so the voter can validate that their information was entered correctly. The Election Worker would then print the form and the voter would sign and date it. Note the form needs to be signed and dated in the presence of an Election Day Special Voting Deputy.
- Election Workers can use [Click and Mail](#) as a data entry portal to key-in paper voter registration forms at the polling place. Using this option the Election Worker is not required to print the [Click and Mail](#) Voter Application (as the voter has already signed a Voter Registration Application) and the election worker is simply performing data entry. However, there are several things the Election Worker must note on the paper form submitted by the voter for every application they enter.

1. The Election Worker must record on the paper form that it was data-entered using Click and Mail.
2. They must record on the form the name of the person who performed the data entry.

3. They must record on the form the date and time the data entry was performed.
4. They must record the **Online App ID** number on every application they enter. This will avoid possible confusion between duplicate applications. In order to see the **Online App ID**, Election Workers will **Click Here to Save or Print Form** after each application is entered and view the PDF. The **Online App ID** will be displayed at the top of the PDF file. Election Workers do not have to print out a duplicate form if they already have a paper copy.

Here are some additional notes that should be kept in mind when using Click and Mail at the polling place:

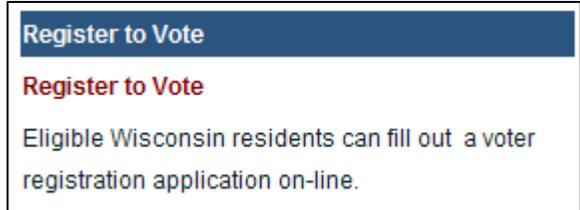

- Election Workers should never use the **Back** button on their internet browser and should be careful using the **Backspace** key on their keyboard as this activates the **Back** button. Using the **Back** button can cause you to lose all of the information you have entered so far. If an Election Worker submits an application and then uses the **Back** button, they will not be able to save the next application. They will return to the first screen and enter a new Voter Application, but the Election Worker will not be able to submit that information – their work will be lost. Election Workers should click the **Close** button after each application is entered and begin again from the VPA home page.
- Applications entered into Click and Mail will not be visible in SVRS until the next morning. Clerks will still have to open the Voter Application form in SVRS and verify that the data was entered correctly. Clerks must also check for voter matches and add proof of residency information before processing the application.

How to Enter an Application through Click and Mail

Instructions for Entering Voter Applications

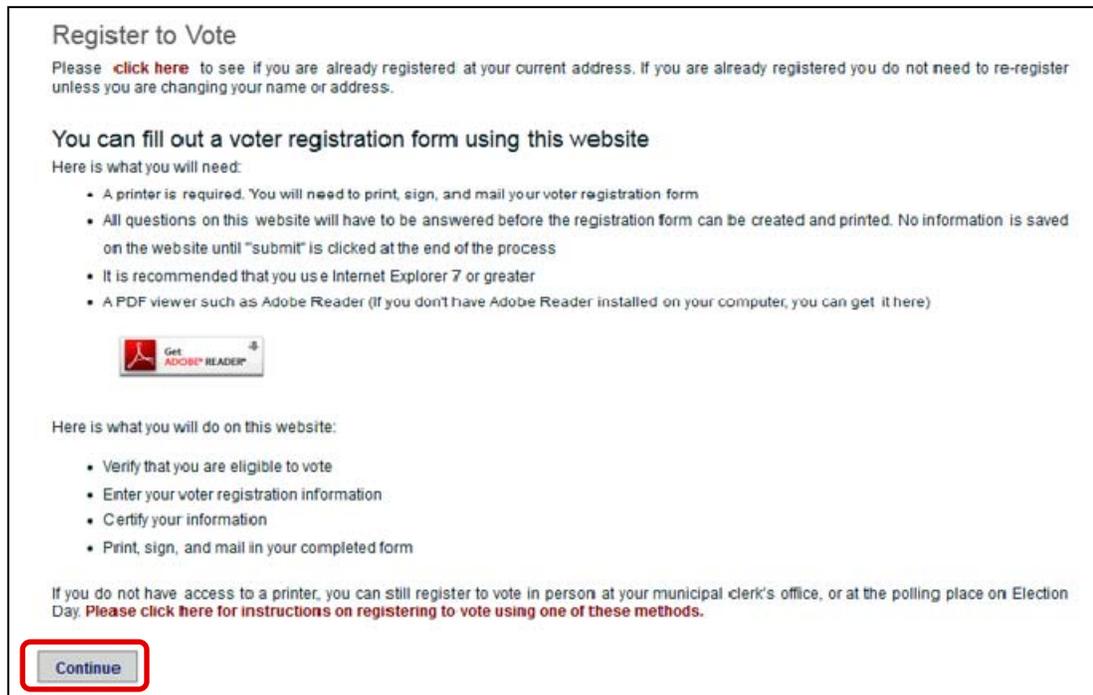

1. First go to the VPA website at <https://vpa.wi.gov>.
2. Click on the **Register to Vote** link in the upper right or find the **Register to Vote** item on the home page of the VPA site. An informational screen will appear.

Voters will be prompted to check their current registration before they register again.

A link will be provided for voters who need information on registering in person at the Municipal Clerk's office or at the polls on Election Day.

3. Click **Continue**.

- Your application must be postmarked 20 days before the next election.
- If you are not currently connected to a printer, you can save this form to your computer and print it later.

If You Are Registering in Wisconsin for the First Time:

- You must also include a copy of an identifying document that provides proof of residence.
- If you do not do this, you will need to bring identifying information to the polls on Election Day in order to vote.
- These documents constitute proof of residence if they contain the voter's current and complete first and last name and residential address, and are valid on the day used to register to vote.
 - A current and valid WI Driver License / ID Card.
 - Any other official identification card or license issued by a Wisconsin governmental body or unit.
 - An employee ID card with a photograph, but not a business card.
 - A real property tax bill or receipt for the current year or the year preceding the date of the election.
 - A residential lease (Does not count as proof of residence if elector submits form by mail).
 - A picture ID from a university, college or technical college coupled with a fee receipt.
 - A picture ID from a university, college or technical college coupled with an on-campus housing listing provided by the university, college or technical college to the municipality that denotes US Citizenship.
 - A utility bill for the period commencing not earlier than 90 days before the day registration is made.
 - A bank statement.
 - A paycheck.
 - A check or other document issued by a unit of government.
- After you have mailed in your signed and dated form, you may visit the Voter Public Access website at <https://vpa.wi.gov> to check the status of your voter registration.

The voter must print, sign, and date the application immediately if they are mailing in the form. If they are hand-delivering the form to the Clerk's office during late registration or hand-delivering the form to the polling place on Election Day, then they should print the form, but wait to sign and date it until Clerk's office staff or an Election Worker can witness their signature.

Clerks can use the Online Mail App. ID field to search for this application in the Voter Applications node of SVRS.
